Additional documentation

## Overview

The `mod_brotli` Apache module provides compression for the Apache HTTP server.

## Usage

This module can increase the loading speed and security of your web pages.

**Important:**

If you install this module, it applies to all virtual hosts.

## Requirements

This module requires EasyApache 4, a secure (`https`) connection, and Apache 2.4.

## Compatibility

This module possesses no known compatibility issues.

## Configuration

cPanel & WHM sets the following configuration settings for the `mod_brotli` Apache module by default:

```
AddOutputFilterByType BROTLI_COMPRESS text/plain text/css text/html
application/json application/javascript application/x-javascript text/xml
application/xml application/xml+rss text/javascript
SetOutputFilter BROTLI_COMPRESS
SetEnvIfNoCase Request_URI \.(?:gif|jpe?g|png)$ no-brotli
```

You can edit the `mod_brotli` Apache module's `.conf` file at the following location:

```
/etc/apache2/conf.d/brotli.conf
```

For more configuration information, read [Apache's mod\\_brotli documentation](#).

## How to install or uninstall mod\_brotli

## In the interface

The easiest way to install or uninstall the `mod_brotli` Apache module is to use WHM's *EasyApache 4* interface (*WHM >> Home >> Software >> EasyApache 4*).

## On the command line

To install the `mod_brotli` Apache module in EasyApache 4, run the following command on the command line:

```
yum install ea-apache24-mod_brotli
```

To uninstall the `mod_brotli` Apache module in EasyApache 4, run the following command on the command line:

```
yum remove ea-apache24-mod_brotli
```
