Description

This function removes the redirection URL from a parked domain (alias).

Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

Examples

Bandwidth

▼ LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$remove_redirect =  
$cpanel->api1('Park',  
'disableredirect',  
array('example.com')  
); // Call the  
function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

▼ LiveAPI Perl Module

```
my $cpliveapi =  
Cpanel::LiveAPI->new(  
); # Connect to  
cPanel - only do this  
once.  
my $remove_redirect =  
$cpliveapi->api1('Par  
k','disableredirect',  
['example.com'] ); #  
Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

Function information

About this module

The `Park` module manages parked domains.

About cPanel API 1

cPanel API 1 accesses information about cPanel accounts.

▼ cPanel Tag System (deprecated)

Warning:

In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel
Module="Park::disable
redirect(
$FORM('domain') )">
```

▼ Command Line

```
cpapil
--user=username Park
disableredirect
example.com
```

Notes:

- You **must** [URI-encode](#) these values.
- username represents your account-level username.
- For more information and additional output options, read our [Guide to cPanel API 1](#) documentation or run the `cpapil --help` command.
- If you run CloudLinux™, you **must** use the full path of the `cpapil` command:

```
/usr/local
/cpanel/bin/cpapil
```

▼ Output (plaintext)

```
nowhere (Redirection
Disabled!)
```

Warning:
cPanel API deprecated. We **strongly** recommend cPanel API or UAPI instead.
