

cPanel PHP

- [Overview](#)
- [PHP modules](#)
- [PEAR and PECL modules](#)
- [PHP loaders](#)
- [PHP and SQL libraries](#)
- [Additional documentation](#)

Overview

cPanel & WHM includes PHP 7.2 and its modules as a set of RPMs. This includes the associated PEAR and PECL packages and PHP loaders.

- PEAR and PECL packages are software components from the PHP Extension and Application Repository (PEAR) and the PHP Extension Community Library (PECL).
- A PHP loader allows PHP to execute encoded applications. Loaders ensure that others cannot access your PHP code.

Note:

These are cPanel & WHM's PHP packages. To view EasyApache 4's PHP packages, read our [PHP Options](#) documentation.

PHP modules

The PHP binary includes the following PHP modules:

- bcmath
- bz2
- Core
- ctype
- curl
- date
- dom
- ereg
- fileinfo
- filter
- ftp
- gd
- gettext
- hash
- iconv
- imap
- json
- libxml
- mbstring
- mcrypt
- mysql
- mysqli
- openssl
- pcntl
- pcre
- PDO
- pdo_mysql
- pdo_pgsql
- pdo_sqlite
- pgsql
- Phar
- posix
- Reflection
- session
- SimpleXML
- soap
- sockets
- SPL
- sqlite3
- standard
- tidy

- tokenizer
- xml
- xmlreader
- xmlrpc
- xmlwriter
- zip
- zlib

PEAR and PECL modules

cPanel & WHM includes the following PEAR and PECL modules:

- Archive_Tar
- Auth_SASL
- Cache
- Console_Color
- Console_Getopt
- Console_Table
- DB
- Date
- Date_Holidays
- Date_Holidays_Australia
- Date_Holidays_Austria
- Date_Holidays_Brazil
- Date_Holidays_Croatia
- Date_Holidays_Czech
- Date_Holidays_Denmark
- Date_Holidays_EnglandWales
- Date_Holidays_Finland
- Date_Holidays_Germany
- Date_Holidays_Iceland
- Date_Holidays_Ireland
- Date_Holidays_Italy
- Date_Holidays_Japan
- Date_Holidays_Netherlands
- Date_Holidays_Norway
- Date_Holidays_PHPdotNet
- Date_Holidays_Portugal
- Date_Holidays_Romania
- Date_Holidays_Russia
- Date_Holidays_SanMarino
- Date_Holidays_Serbia
- Date_Holidays_Slovenia
- Date_Holidays_Spain
- Date_Holidays_Sweden
- Date_Holidays_Turkey
- Date_Holidays_UNO
- Date_Holidays_USA
- Date_Holidays_Ukraine
- Date_Holidays_Venezuela
- File
- File_Find
- File_Fstab
- HTML_Template_IT
- HTTP
- HTTP_Request
- HTTP_WebDAV_Server
- Log
- MDB2
- Mail
- Mail_Mime
- Net_DNS2
- Net_FTP
- Net_IMAP
- Net_SMTP
- Net_Sieve
- Net_Socket
- Net_URL
- Net_UserAgent_Detect
- PEAR

- [PEAR_Command_Packaging](#)
- [SOAP](#)
- [Services_Weather](#)
- [Structures_Graph](#)
- [Text_Figlet](#)
- [XML_Parser](#)
- [XML_RPC](#)
- [XML_SVG](#)
- [XML_Serializer](#)
- [XML_Util](#)

PHP loaders

cPanel & WHM includes the following PHP loaders:

- [ioncube](#)
- [sourceguardian](#)

For more information about the *cPanel PHP loader* option, read our [Tweak Settings - PHP](#) documentation.

PHP and SQL libraries

The PHP binary links to both the MySQL® and PostgreSQL® libraries. The `/usr/local/cpanel/3rdparty` file provides these libraries.
