

Change an Account Package

This documentation is for a previous release of cPanel & WHM. To view our latest documentation, visit our [Home page](#).

For cPanel & WHM 54

([Home](#) >> [Account Information](#) >> [List Accounts](#))

[Overview](#)

[How to change an account's package](#)

Overview

You can change an account's package with the *List Accounts* interface. This can be useful when an account holder has changed the account's hosting package.

A package is a set of definitions with which the account must comply.

How to change an account's package

To change an account's package:

1. Click the + button that corresponds to the account you wish to edit. A hidden menu will open below the account's row.
2. Click the *Change Plan* button. You will be redirected to the *Upgrade/Downgrade an Account* interface.
3. Select the new package.
 - To view the package's configuration, select an available package and place your mouse cursor over the magnifying glass icon. A window with the basic package information will appear. See the screenshot below for a detailed view.
4. Click *Upgrade/Downgrade*.

Page package
