

# Change Logs

These change logs list details about updates in each version of our software.

## cPanel & WHM

A version's change log includes entries for both the development and production releases of that version.

For example, changes in cPanel & WHM version 65 appear in the change log for version 66. This is because 65 is the development version whose changes are released in the production version 66. For more information, read our [cPanel & WHM Product Versions and the Release Process](#) documentation.

For more detailed information about the changes in a specific version of cPanel & WHM, please read that version's Release Notes.
