Description

This function checks the domain's Microsoft® FrontPage® Extensions status.

Notes:

- In cPanel & WHM version 11.44, if you uninstalled FrontPage extensions, or if FrontPage was never installed on the server, the server will ignore all FrontPage settings.
- In cPanel & WHM version 11.46 and later, FrontPage extensions are no longer supported. These functions will **only** return 'not installed' or an error message.

Warning:

cPanel API 1 is **deprecated**. Do not use this function. Instead, we **strongly** recommend that you use the following newer functions:

- **UAPI (recommended)** — *None*.
- **cPanel API 2** — `Frontpage::fpenabled` — This function checks whether Microsoft® FrontPage® is enabled.

Examples

LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$check_frontpage =  
$cpanel->apil('FrontP  
age', 'ftpstatus', arra  
y('example.com') );  
// Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

Function information

About this module

The FrontPage module manages Microsoft® FrontPage® on the server.

About cPanel API 1

cPanel API 1 accesses information about cPanel accounts.

▼ LiveAPI Perl Module

```
my $cpliveapi =
Cpanel::LiveAPI->new(
); # Connect to
cPanel - only do this
once.
my $check_frontpage =
$cpliveapi->apil('FrontPage','ftpstatus',[
'example.com'] ); #
Call the function.
```

Note:
For more information, read our [Guide to the LiveAPI System](#).

▼ cPanel Tag System (deprecated)

Warning:
In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel
Module="FrontPage::ftpstatus($FORM('domain'))">
```

Warning:
cPanel API deprecated. We **strongly** recommend cPanel API or UAPI instead.

Notes:

- The Fe
- Ur mi us 20 or 20).` 20 or 20).

Find a function

•
The FrontPage module manages Microsoft® FrontPage®.

- DiskUsage: show manager
- addautoresponder
 - addforward
 - addfilter
 - addlist
 - addmx
 - addpop
 - addspam
 - addspambox
 - addspamfilter
 - changemx
 - checkfastmail
 - checkpipeforward
 - clearspambox
 - delautoresponder
 - delforward
 - delfilter
 - dellist
 - delmx
 - delpop
 - delspam
 - delspambox
 - disable_spam_autodelete
 - editquota
 - enable_spam_autodelete
 - getaging
 - getarsbody
 - getarscharset
 - getarsfrom
 - getarshtml
 - getarsinterval

Command Line

```
cpapil
--user=username
FrontPage fpstatus
domain=example.com
```

Notes:

- You **must** URI-encode these values.
- username represents your account-level username.
- For more information and additional output options, read our [Guide to cPanel API 1](#) documentation or run the `cpapil --help` command.
- If you run CloudLinux™, you **must** use the full path of the `cpapil` command:

```
/usr/local
/cpanel/bin/cpapil
```

Output (plaintext)

```
installed
```

Parameters

Parameter	Type	Description	Possible values	Example
domain	string	Required The domain name.	A valid domain name.	example.com

Returns

- `installed` — FrontPage is installed for the account.
- `not installed` — FrontPage is **not** installed for the account.

In cPanel & WHM version 11.46 and later, this function returns 'not installed' or an error message.

- cPanel API 1 Functions - Front Page ::addfp — This function adds Microsoft® Front Page® Extensions to the domain.
- cPanel API 1 Functions - Front Page ::delfp — This function removes Microsoft® Front Page® Extensions from the domain.
