Overview

The *Manual Resource Options* section appears when you select the *Select package options manually* checkbox in the *Package* section.

Note:

Before you set quotas, consider the type of content that your users intend to host.

Manual Resource Options

You can select the following resource options in the *Manual Resource Options* section:

Option	Description
Disk Space Quota (MB)	The amount of space on the server's hard drive for the new account, in Megabytes (MB).

<i>Bandwidth Limit (MB)</i>	The maximum amount of data that the new account can transfer each month, in Megabytes (MB).
<i>Max FTP Accounts</i>	The maximum number of FTP accounts for the new account.
<i>Max Email Accounts</i>	The maximum number of email accounts for the new account.
<i>Max Mailing Lists</i>	<p>The maximum number of mailing lists for the new account.</p> <div style="border: 1px solid #FFD700; padding: 5px; margin-top: 10px;"> <p>Note: The Mailman application handles mailing lists. For more information, read the Mailman documentation.</p> </div>
<i>Max SQL Databases</i>	<p>The maximum number of each available type of SQL database.</p> <p>For example, if you set this value to 5 and allow MySQL® and PostgreSQL® databases, the account can create up to five MySQL databases and up to five PostgreSQL databases.</p>
<i>Max Sub Domains</i>	<p>The maximum number of subdomains that the new account may create.</p> <div style="border: 1px solid #FF0000; padding: 5px; margin-top: 10px;"> <p>Important: A value of 0 prevents subdomain creation.</p> </div>
<i>Max Parked Domains</i>	<p>The maximum number of parked domains (aliases) that the new account may create.</p> <div style="border: 1px solid #FF0000; padding: 5px; margin-top: 10px;"> <p>Important: A value of 0 prevents parked domain creation.</p> </div>
<i>Max Addon Domains</i>	<p>The maximum number of addon domains that the new account may create.</p> <div style="border: 1px solid #FF0000; padding: 5px; margin-top: 10px;"> <p>Important: A value of 0 prevents addon domain creation.</p> </div>

<p><i>Maximum Hourly Email by Domain Relayed</i></p>	<p>The maximum number of emails that a domain can send per hour. This option sets the same limit for every domain on the account.</p> <ul style="list-style-type: none"> • This value defaults to <i>Unlimited</i>. • A value of 0 indicates <i>Unlimited</i>. <div style="border: 1px solid #f0e68c; padding: 5px; margin-top: 10px;"> <p>Note: To set different limits for each domain, read our How to Set Email Send Limits documentation.</p> </div>
<p><i>Maximum percentage of failed or deferred messages a domain may send per hour</i></p>	<p>The maximum percentage of failed or deferred messages that a domain can send before your server temporarily blocks outgoing mail from that domain.</p> <ul style="list-style-type: none"> • The system examines outgoing and local mail over the previous hour to determine whether the domain exceeds the limit. • When a domain exceeds the limit, it cannot send mail until the domain no longer exceeds the limit. • The default value is <i>unlimited</i>.
