

Mailserver Configuration

For cPanel & WHM version 11.50

([Home](#) >> [Service Configuration](#) >> [Mailserver Configuration](#))

This set of interfaces allow you to configure the POP3 and IMAP protocols that the Courier and Dovecot mail servers use.

- [Configure Courier](#) — These options appear when you access WHM's *Mailserver Configuration* interface while you run the Courier mail server.
- [Configure Dovecot](#) — These options appear when you access WHM's *Mailserver Configuration* interface while you run the Dovecot mail server.

Additional documentation

- [IMAP vs. POP3](#) — This document explains the fundamental differences between IMAP and POP3.
