

# WHM API 1 Functions - exim\_configuration\_check

## Guide to WHM API 1

- Return Data
- Filter Output
- Sort Output
- Paginate Output
- Output Columns
- Call cPanel API 2 and UAPI

## Description

This function scans the Exim configuration file for errors, and if it finds errors attempts to repair them.

### Important:

In cPanel & WHM version 76 and later, when you disable the `MailSend` role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

## Examples

### JSON API

```
https://hostname.example.com:2087/cpsess#####/json-api/exim_configuration_check?api.version=1
```

### XML API

```
https://hostname.example.com:2087/cpsess#####/xml-api/exim_configuration_check?api.version=1
```

## Function information

## About WHM API 1

WHM API 1 performs functions and accesses data in WHM.

Command Line

```
whmapil  
exim_configuration_check
```

Notes:

- Unless otherwise noted, you **must** URI-encode values.
- For more information and additional output options, read our [Guide to WHM API 1](#) documentation or run the `whmapil --help` command.
- If you run CloudLinux™, you **must** use the full path of the `whmapil` command:

```
/usr/local  
/cpanel/bin/whmapil
```

Output (JSON)

```
{  
  "data": {  
    "message":  
      "cPanel was unable to automatically merge your Exim configuration with the new settings that shipped \nwith the build you have installed (11.38.0 (build 9999)) because you have a custom or broken configuration which \ncannot be automatically configured. \nSince this configuration update is not critical, we left your previous configuration intact until \nthe new configuration can be properly installed. In order

#### Output (XML)

```
<result>  
  <data>  
    <message>  
      cPanel  
      was unable to  
      automatically merge  
      your Exim  
      configuration with  
      the new  
      settings that shipped  
      with the build you  
      have installed  
      (11.38.0 (build  
      9999)) because you  
      have a custom or  
      broken configuration  
      which cannot be  
      automatically  
      configured. Since  
      this configuration  
      update is not  
      critical, we left  
      your previous  
      configuration intact  
      until the new  
      configuration can be  
      properly installed.  
      In order to complete  
      this  
      configuration update,  
      you will need to  
      manually merge your  
      configuration  
      with the new  
      configuration  
      settings. Please  
      follow the steps  
      below to  
      complete this update:  
      1. <a  
      href="javascript:select_exim_backup();">Backup your existing  
      configuration</a> 2.
