Overview

This interface allows you to view available locales, cross-referenced against the themes for which they are available.

How to view available locales

A check mark (

) indicates that the locale is available for a particular theme.

The *Provider* column displays whether cPanel, Inc. provided the locale.

Icon	Provider
	cPanel, Inc. provided this locale.
	cPanel, Inc. did not provide this locale.

Note:

To refresh the list of your system's locales, click *rebuild the locale databases* at the bottom of the interface to update the system.
