[Overview](#)

[Allow certificate sharing](#)

## Overview

If you are the server administrator, you can allow your users to share your SSL certificate.

## Allow certificate sharing

To change your permissions for certificate sharing, perform the following steps:

1. In the *Manage SSL Certificate Sharing* interface, click *Enable Sharing*.
  - Click *Disable Sharing* if you do not want your users to share your certificate.
2. Under the *Certificate Linking* heading, select a domain to see an accurate example of the link.
  - If you enabled sharing, your users can now share the SSL certificate at this URL.
