

# Update My Information

(Dashboard >> Users >> Update My Information)

## Overview

This interface allows you to update the information for your own user account. Use this interface to hide unused features from your *Dashboard* or to limit your own list of Groups and Packages.

## Update your information

For detailed information about the available options, read the [Edit Users](#) documentation.

**Warning:**

For security reasons, the interface does not display your password in the *Password* text box. If you do not wish to change your password, leave this text box blank when you update other information.
