Description

This function returns a warning if the permissions for the `/usr/bin/crontab` file are not 4755.

Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

Examples

LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$crontab_permissions  
=  
$cpanel->api1('Cron',  
'crontab_perms'); //  
Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

LiveAPI Perl Module

```
my $cpliveapi =  
Cpanel::LiveAPI->new(  
); # Connect to  
cPanel - only do this  
once.  
my  
$crontab_permissions  
=  
$cpliveapi->api1('Cro  
n', 'crontab_perms');  
# Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

Function information

About this module

The `Cron` module manages the cron daemon.

About cPanel API 1

cPanel API 1 accesses information about cPanel accounts.

▼ cPanel Tag System (deprecated)

Warning:
 In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel
Module="Cron::crontab
_perms()">
```

▼ Command Line

```
cpapil
--user=username Cron
crontab_perms
```

Notes:

- You **must** [URI-encode](#) these values.
- username represents your account-level username.
- For more information and additional output options, read our [Guide to cPanel API 1](#) documentation or run the `cpapil --help` command.
- If you run CloudLinux™, you **must** use the full path of the `cpapil` command:

```
/usr/local
/cpanel/bin/cpapil
```

▼ Output (plaintext)

```
/usr/bin/crontab
permissions are wrong
0755. Please set to
4755.
```

Warning:
 cPanel API deprecated. We **strongly** recommend cPanel API or UAPI instead.
