

FTP Connections

For cPanel & WHM version 62

(Home >> Files >> FTP Connections)

Overview

This interface displays information about current connections to your FTP server and it allows you to terminate those connections.

Note:

The *FTP Connections* icon appears only if your hosting provider enables FTP services and anonymous FTP.

View current FTP sessions

The interface includes the following information about connections to your FTP server:

Column	Description	Example
<i>User</i>	The username for the authenticated FTP account.	<i>user</i>
<i>Logged in From</i>	The host through which the user connected to your FTP server.	<i>ns1.example.com</i>
<i>Login Time</i>	The FTP session's start time and date.	<i>Fri Jul 19 13:19:20 2013</i>
<i>Status</i>	The FTP session's status.	<i>IDLE</i>
<i>Process ID</i>	The FTP session's process ID.	<i>13926</i>
<i>Actions</i>	The actions that you may take perform with FTP session: <ul style="list-style-type: none"><i>Disconnect</i> — Allows you to disconnect the FTP session.	

To refresh the list of FTP sessions, click *Reload*.

Disconnect users from an FTP session

If you suspect malicious activity from a user, or if the user is idle, you can disconnect their FTP session.

To disconnect a user from an FTP session, perform the following steps:

1. Click *Disconnect* next to the FTP session that you wish to disconnect.
2. To verify that the server disconnected the session, click *Reload*.
