Description

This function deletes an FTP account.

Warning:

cPanel API 1 is **deprecated**. Do not use this function. Instead, we **strongly** recommend that you use the following newer functions:

- **UAPI (recommended)** — `Ftp::delete_ftp` — This function deletes an FTP account.
- **cPanel API 2** — `Ftp::delftp` — This function deletes an FTP account.

Important:

In cPanel & WHM version 76 and later, when you disable the FTP role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

Examples

CPANEL(); // Connect  
to cPanel - only do  
this once.  
$delete_ftpuser =

'1') ); // Call the  
function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).
