Overview

This document describes how to directly log in to your `sent` or `spam` mail folder in one easy step.

Log in to your sent or spam mail folder

To log in to your `sent` or `spam` mail folder, perform the following steps:

1. Open your email client.
2. Modify your login username as follows:
 - If you are the main cPanel account owner, append `/sent` or `/spam` to your username. For example, `joe/sent` or `joe/spam`.
 - If you are not the main cPanel account owner, append `/sent` or `/spam` to your email address. For example, `joe@example.com/sent` or `joe@example.com/spam`.
3. cPanel will open your `sent` or `spam` folder.

Compatibility with email clients

- Your ability to access this feature from a mobile device will depend on your service provider.
- This feature should work with most standalone email clients. However, this feature is *not* available from our cPanel-provided webmail clients.
