- [Overview](#)
- [Predefined feature lists](#)
- [Create or edit a feature list](#)
 - [Selectable features](#)
- [Delete a feature list](#)

Overview

This interface allows you to edit feature lists, which you can then assign to packages that you apply to accounts. Feature lists provide or prevent access to specific cPanel & WHM features.

Predefined feature lists

cPanel & WHM includes two predefined feature lists. They are the *default* and *disabled* feature lists.

- If you disable a feature in the *default* feature list, it will be disabled by default for all of the users on your server. To override this, create and assign a new list to your users.
- If you disable a feature in the *disabled* feature list, it will be disabled for all of the users on your server. You **cannot** override this feature list with a new list.

Create or edit a feature list

To create a new feature list or edit an existing feature list, perform the following steps:

1. Choose one of the following options:
 - To create a new feature list, enter the desired feature list name in the *Feature List Name* text box and click *Add*.

Note:

Choose a name that is easy to remember so that you can properly assign it.

- To edit an existing feature list, select the desired feature list from the *Edit a Feature List* menu and click *Edit*.
2. Select the checkboxes for the options that you wish to enable, or deselect the checkboxes for the features that you wish to disable.
3. Click *Save*.

Selectable features

Warning:

Various settings and customizations can add or remove features from this interface. The list below is **not** canonical for every server.

On most cPanel & WHM servers, you can select the following features:

- *API Shell (for developers)* — Enables the *API Shell* interface ([Home](#) >> [Advanced](#) >> *API Shell*).
- *Ability to Change MX* — Allows the user to modify MX entries.
- *Addon Domain Manager* — Allows the user to manage addon domains.

- *Advanced DNS Zone Editor* — Enables the *Advanced DNS Zone Editor* interface (*Home >> Domains >> Advanced DNS Zone Editor*).
- *Advanced Guestbook* — Enables the *Advanced Guestbook* feature in the *CGI Center* interface (*Home >> Software and Services >> CGI Center*).
- *Agora Shopping Cart* — Enables *Agora Shopping Cart*.
- *Analog Stats* — Enables the Analog statistics program.
- *Apache Handlers Manager* — Enables the *Apache Handlers* interface (*Home >> Advanced >> Apache Handlers*).
- *Autoresponder Manager* — Enables the *Auto Responders* interface (*Home >> Mail >> Auto Responders*).

Note:

In the Paper Lantern theme, this is the *Autoresponders* interface (*Home >> Email >> Autoresponders*).

- *Awstats Stats* — Enables the AWStats statistics program.
- *Backup Manager* — Enables the *Backups* interface (*Home >> Files >> Backups*).
- *Backup Wizard* — Enables the *Backup Wizard* interface (*Home >> Files >> Backup Wizard*).
- *Bandwidth Stats* — Enables the *Bandwidth* interface (*Home >> Logs >> Bandwidth*).
- *BoxTrapper Spam Trap* — Enables the *BoxTrapper* interface (*Home >> Mail >> BoxTrapper*).
- *CGI Center* — Enables the *CGI Center* interface (*Home >> Software and Services >> CGI Center*).
- *CPU and Concurrent Connection Usage* — Enables the *CPU Usage* statistic in the cPanel Home interface's *Stats* section.
- *CSV Import (Email & Forwarders)* — Enables the use of .csv files to import new email addresses or forwarders.
- *Change Language* — Enables the *Change Language* interface (*Home >> Preferences >> Change Language*).
- *Change Style* — Enables the *Change Style* interface (*Home >> Preferences >> Change Style*).
- *Choose Log Programs* — Enables the *Choose Log Programs* interface (*Home >> Logs >> Choose Log Programs*).
- *Counter* — Enables the *Counter* feature in the *CGI Center* interface (*Home >> Software and Services >> CGI Center*).
- *Crontab* — Enables the *Cron Jobs* interface (*Home >> Advanced >> Cron Jobs*).
- *Custom Error Pages* — Enables the *Error Pages* interface (*Home >> Advanced >> Error Pages*).
- *Default Address Manager* — Enables the *Default Address* interface (*Home >> Mail >> Default Address*).
- *Directory Selection Popup* — Enables the *Directory Selection* window when the user opens the File Manager.
- *Disk Usage Viewer* — Enables the *Disk Space Usage* interface (*Home >> Files >> Disk Space Usage*).
- *Email Account Manager* — Enables the *Email Accounts* interface (*Home >> Mail >> Email Accounts*).
- *Email Archiving* — Enables the *Email Archiving* interface (*Home >> Mail >> Email Archiving*).
- *Email Authentication* — Enables the *Email Authentication* interface (*Home >> Mail >> Email Authentication*).

Note:

In the Paper Lantern theme, this is the *Authentication* interface (*Home >> Mail >> Authentication*).

- *Email Delivery Route* — **Deprecated.**
- *Email Domain Forwarding* — Enables domain forwarders.
- *Email Filtering Manager* — Enables the *User Level Filtering* interface (*Home >> Mail >> User-Level Filtering*).
- *Email Scripts (cgimail,formmail)* — Enables CGI email scripts.
- *Email Trace* — Enables the *Email Trace* interface (*Home >> Mail >> Email Trace*).
- *Entropy Banner* — Enables the *Entropy Banner* feature in the *CGI Center* interface (*Home >> Software and Services >> CGI Center*).
- *Entropy Search* — Enables the *Entropy Search* feature in the *CGI Center* interface (*Home >> Software and Services >> CGI Center*).
- *Error Log* — Enables the error log.
- *File Manager* — Enables the *File Manager* interface (*Home >> Files >> File Manager*).
- *Forwarder Manager* — Enables the *Forwarders* interface (*Home >> Files >> File Manager*).
- *Ftp Account Manager* — Enables the *FTP Accounts* interface (*Home >> Files >> FTP Accounts*).
- *Ftp Settings* — Allows the user to manage FTP settings.
- *Getting Started Wizard* — Enables the *Getting Started Wizard*.
- *Hotlink Protection* — Enables the *HotLink Protection* interface (*Home >> Security >> HotLink Protection*).
- *IP Deny Manager* — Enables the *IP Address Deny Manager* interface (*Home >> Security >> IP Address Deny Manager*).
- *Image Manager* — Enables the *Image Manager* interface (*Home >> Advanced >> Image Manager*).
- *Index Manager* — Enables the *Index Manager* interface (*Home >> Advanced >> Index Manager*).
- *Install PHP Pear Modules* — Allows the user to install PHP PEAR modules.
- *Install Perl Modules* — Allows the user to install Perl modules.
- *Install Ruby Modules* — Allows the user to install Ruby on Rails modules.
- *Java Clock* — Enables clocks in the *CGI Center* interface (*Home >> Software and Services >> CGI Center*).
- *Java Countdown* — Enables countdowns in the *CGI Center* interface (*Home >> Software and Services >> CGI Center*).
- *Latest Visitors* — Enables the *Latest Visitors* interface (*Home >> Logs >> Latest Visitors*).
- *Leech Protect (requires Webprotect)* — Enables the *Leech Protect* interface (*Home >> Security >> Leech Protect*).
- *Logaholic Web Analytics* — Enables the Logaholic statistics program.
- *Mailman List Manager* — Enables the *Mailing Lists* interface (*Home >> Mail >> Mailing Lists*).
- *Mime Types Manager* — Enables the *MIME Types* interface (*Home >> Advanced >> MIME Types*).
- *Mod_Security™ Domain Manager* — Enables the *ModSecurity Domain Manager* interface (*Home >> Security >> ModSecurity™ Domain Manager*).
- *Mysql* — Enables MySQL®.
- *Network Tools* — Enables the *Network Tools* interface (*Home >> Advanced >> Network Tools*).
- *Optimize Website* — Enables the *Optimize Website* interface (*Home >> Software and Services >> Optimize Website*).
- *PGP/GPG* — Enables PGP and GPG encryption.
- *Parked Domain Manager* — Enables the *Parked Domains* interface (*Home >> Domains >> Parked Domains*).

Note:

In the Paper Lantern theme, this is the [Aliases](#) interface ([Home >> Domains >> Aliases](#)).

- [Password Change](#) — Enables the [Change Password](#) interface ([Home >> Preferences >> Change Password](#)).
- [PhpMyAdmin](#) — Enables phpMyAdmin.
- [PhpPgAdmin](#) — Enables phpPgAdmin.
- [PostgreSQL](#) — Enables PostgreSQL.
- [Random Html Generator](#) — Enables the [Random HTML Generator](#) feature in the [CGI Center](#) interface ([Home >> Software and Services >> CGI Center](#)).
- [Raw Access Logs](#) — Enables the [Raw Access Logs](#) interface ([Home >> Logs >> Raw Access Logs](#)).
- [Redirect Manager](#) — Enables the [Redirects](#) interface ([Home >> Domains >> Redirects](#)).
- [Ruby on Rails](#) — Enables Ruby on Rails®.
- [SSH Connection Window](#) — Enables SSH.
- [SSL Host Installer](#) — Enables SSL certificate installation.
- [SSL Manager](#) — Enables the [Manage SSL Hosts](#) interface ([Home >> SSL/TLS >> Manage SSL Hosts](#)).
- [See PHP Configuration](#) — Enables the [PHP Configuration](#) interface ([Home >> Software and Services >> PHP Configuration](#)).
- [Server Status Viewer](#) — Enables the [Service Status](#) section of the cPanel [Home](#) interface.
- [Simple Cgi Wrapper](#) — Enables the [Simple CGI Wrapper](#) feature in the [CGI Center](#) interface ([Home >> Software and Services >> CGI Center](#)).
- [Simple DNS Zone Editor](#) — Enables the [Simple DNS Zone Editor](#) interface ([Home >> Domains >> Simple DNS Zone Editor](#)).
- [Simple Guestbook](#) — Enables the [Simple Guestbook](#) feature in the [CGI Center](#) interface ([Home >> Software and Services >> CGI Center](#)).
- [Site Software](#) — Enables the [Site Software](#) interface ([Home >> Software and Services >> Site Software](#)).
- [SpamAssassin](#) — Enables the [Apache SpamAssassin™](#) interface ([Home >> Mail >> Apache SpamAssassin](#)).
- [SpamAssassin Spam Box](#) — Enables Apache SpamAssassin's Spam Box feature.
- [Statistics Program Manager](#) — Enables the [Choose Log Programs](#) interface ([Home >> Logs >> Choose Log Programs](#)).
- [Subdomain Manager](#) — Enables the [Subdomains](#) interface ([Home >> Domains >> Subdomains](#)).
- [Subdomain Stats](#) — Enables statistics for subdomains.
- [Theme Switching](#) — Enables the [Switch Theme](#) menu in the cPanel [Home](#) interface.
- [Update Contact Information](#) — Enables the [Update Contact Information](#) interface ([Home >> Preferences >> Update Contact Information](#)).

Important:

If you disable the [Update Contact Information](#) option, the options that the [Update Notification Preferences](#) option enables will not be available.

- [Update Notification Preferences](#) — Enables notification preference options in the [Update Contact Information](#) interface ([Home >> Preferences >> Update Contact Information](#)).
- [Video Tutorials](#) — Enables the [Video Tutorials](#) interface ([Home >> Preferences >> Video Tutorials](#)).
- [Virus Scanner](#) — Enables ClamAV virus scans.
- [Web Disk](#) — Enables the [Web Disk](#) interface ([Home >> Files >> Web Disk](#)).
- [Webalizer Stats](#) — Enables the Webalizer statistics program.
- [Webmail](#) — Enables Webmail.
- [Webprotect](#) — Enables the WebProtect application.

Delete a feature list

To remove an existing feature list, perform the following steps:

1. Use the [Delete a Feature List](#) menu to select the feature list that you would like to remove.
2. Click [Delete](#).
