

Manage Certificate Sharing

For cPanel & WHM version 58

(Home >> Security >> SSL/TLS)

Overview

If you are a server administrator or a reseller on the server, you can share your SSL certificate with your users.

Allow certificate sharing

To change your permissions for certificate sharing, perform the following steps:

1. In the *Manage SSL Certificate Sharing* interface, click *Enable Sharing*.
 - Click *Disable Sharing* if you do not want to share your certificate with your users.
2. Select a domain from the *Certificate Linking* menu. The interface will display the link to the shared certificate that the domain will use.
