

Mail Routing Settings

This document is for a previous release of cPanel & WHM. To view our latest documentation, visit our [Home page](#).

For cPanel & WHM 11.48

Overview

These settings allow you to specify how mail should be routed for the new account.

Settings

You may select one of the following settings.

Setting	Description
Automatically Detect Configuration	Automatically detect which setting to use. <div style="border: 1px solid #f0e68c; padding: 5px; margin-top: 10px;">Note: We recommend that you select this setting.</div>
Local Mail Exchanger	Accept mail locally for the new domain.
Backup Mail Exchanger	Configure the server to be a backup mail exchanger for this domain.
Remote Mail Exchanger	Do not accept mail locally for this domain.

Finally, click *Create* to create the new account.
