

Release Notes

These release notes lists new, updated, and deprecated features in each version of our software.

We publish release notes each time that we deploy major production release version to the EDGE tier. A version's release notes list new, updated, deprecated, and removed features. The release notes also include third-party software versions and new and updated API calls.

For more information, read our [cPanel & WHM Product Versions and the Release Process](#) documentation.

Currently-supported versions

The following sets of release notes contain information about currently-supported versions of cPanel & WHM.

For more information, read our [cPanel & WHM Long-Term Support](#) documentation.

- [78 Release Notes](#)
- [76 Release Notes](#)
- [70 Release Notes](#)

Legacy versions of cPanel & WHM

To view release notes for cPanel & WHM versions that we no longer support, read our [Release Notes for Legacy Versions of cPanel & WHM](#) documentation.
