

Manage Plugins

(WHM >> Home >> cPanel >> Manage Plugins)

- [Overview](#)
- [Install a plugin](#)
- [Uninstall a plugin](#)
- [Additional documentation](#)

Overview

The *Manage Plugins* interface allows you to add and remove plugins. Plugins provide additional functionality for your server. The plugins that this interface lists vary from server to server.

Note:

For more information about WHM plugin development, read our [Guide to WHM Plugins](#) documentation.

Install a plugin

To install a plugin, click *Install* for the plugin that you wish to install.

A progress window will appear in the interface, and it will display a success message when installation finishes.

Note:

To access an installed plugin, use WHM's *Home* interface or left-side navigation menu to access the *Plugins* section and its interfaces.

Uninstall a plugin

To uninstall a plugin, click *Uninstall* for the plugin that you wish to uninstall.
