Description

This function removes a MIME type from Apache.

Important:

In cPanel & WHM version 76 and later, when you disable the `webServer` role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

Examples

```
https://hostname.example.com:2083/cpsess#####/execute/Mime/delete_mime?type=text%2Ffoo
```

Note:

This example calls the UAPI function via a cPanel session. For more information, read our [Guide to UAPI](#) documentation.

```
$cpanel = new CPANEL(); // Connect to cPanel - only do this once.
```

```
// Remove MIME type of text/foo
$mime_delete_mime = $cpanel->uapi(
    'Mime', 'delete_mime',
    array(
        'type' => 'text/foo',
    )
);
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

```
my $cpliveapi = Cpanel::LiveAPI->new(); # Connect to cPanel - only do this once.
```

```
# Remove MIME type of text/foo
my $mime_delete_mime = $cpliveapi->uapi(
    {
        'Mime', 'delete_mime',
        {
            'type' => 'text/foo',
        }
    }
);
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

Function information

Module:

Mime

API Version:

UAPI

Available in:

cPanel 11.42+

Methods:

GET, POST

Required Parameters:

type

Return format:

JSON, XML

Legacy Equivalents:

- [Mime::del_mime](#)

About this module

The `Mime` module manages redirections.

About UAPI

UAPI accesses and modifies data for cPanel accounts.

Notes:

DNS:: [ensure_domains_reside_only_locally](#)

```
<!-- Remove MIME type of text/foo -->
[% data = execute( 'Mime', 'delete_mime', {'type' => 'text/foo',} ); %]
```

Note:

For more information, read our [Guide to Template Toolkit](#) documentation.

```
uapi --user=username Mime delete_mime type=text%2Ffoo
```

Notes:

- You **must** [URI-encode](#) values.
- `username` represents your account-level username.
- For more information and additional output options, read our [Guide to UAPI](#) documentation or run the `uapi --help` command.
- If you run CloudLinux™, you **must** use the full path of the `uapi` command:

```
/usr/local/cpanel/bin/uapi
```

```
{
  "messages": null,
  "errors": null,
  "status": 1,
  "data": null
}
```

Note:

Use cPanel's [API Shell](#) interface (*cPanel >> Home >> Advanced >> API Shell*) to directly test cPanel API calls.

Parameters

Parameter	Type	Description	Possible values	Example
<code>type</code>	<i>string</i>	Required The MIME type.	A valid MIME type.	<code>text/foo</code>

Returns

This function only returns metadata.

• The functions may require specific features. To enable a feature, use WHM's [Feature Manager](#) interface.

• Unless you call this API via the WHM
