## Description

This function resets all of the `dynamicui.conf` file's items.

### Note:

cPanel API 2's `Branding` module **only** modifies data for the x3 theme. To customize the Paper Lantern theme, use [UAPI](#) functions. For more information, read our [Guide to cPanel Interface Customization and Branding](#) documentation.

### Warning:

We **strongly** recommend that you use [UAPI](#) instead of cPanel API 2. However, no equivalent UAPI function exists.

## Examples

```
https://hostname.example.com:2087/cpsess#####/json-api/cpanel?
cpanel_jsonapi_user=user&cpanel_jsonapi_apiversion=2&cpanel_jsonapi_module=Branding&cpanel_jsonapi_func=resetall
```

### Note:

For more information, read our [Calls from the WHM API](#) documentation.

```
$cpanel = new CPANEL(); // Connect to cPanel - only do this once.
```

```
// Reset branding items.
$reset_items = $cpanel->api2(
    'Branding', 'resetall'
);
```

### Note:

For more information, read our [Guide to the LiveAPI System](#).

## Function information

### Module:

Branding

### API Version:

cPanel API 2

### Available in:

cPanel 11+

### Methods:

GET, POST

### Required Parameters:

(none)

### Return Format:

JSON, XML

### Notes:

- XML output of this function.
- cPanel deprecated XML output.

### Legacy Equivalents:

(none)

## About this module

The `Branding` module accesses cPanel's theming system.

## About cPanel API 2

cPanel API 2 accesses and modifies data for cPanel accounts.

```
my $cpliveapi = Cpanel::LiveAPI->new(); # Connect to
cPanel - only do this once.

# Reset branding items.
my $reset_items = $cpliveapi->api2(
    'Branding', 'resetall',
);
```

**Note:**

For more information, read our [Guide to the LiveAPI System](#).

**Warnings:**

- In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs. Examples are **only** present in order to help developers move from the old cPanel tag system to our [LiveAPI](#).
- cPanel API 2 calls that use cPanel tags vary in code syntax and in their output.
- For more information, read our [Deprecated cPanel Tag Usage](#) documentation.

```
cpapi2 --user=username Branding resetall
```

**Notes:**

- You **must** [URI-encode](#) values.
- `username` represents your account-level username.
- You **must** run the `--user=username` command.
- For more information and additional output options, read our [Guide to cPanel API 2](#) documentation or run the `cpapi2 --help` command.
- If you run CloudLinux™, you **must** use the full path of the `cpapi2` command:

```
/usr/local/cpanel/bin/cpapi2
```

```
