

Show Reseller Accounts

(WHM >> Home >> Resellers >> Show Reseller Accounts)

- [Overview](#)
- [Show reseller accounts](#)
- [Additional documentation](#)

Overview

This interface lists the server's reseller accounts.

Show reseller accounts

- The interface displays the account owner, and then lists accounts that the reseller owns. For example, you, the system administrator, appear as *root* and the accounts that you own appear in a list.
- The interface also displays each user's domain and the package that the account uses.
