

Show IP Address Usage

For cPanel & WHM version 58

(Home >> IP Functions >> Show IP Address Usage)

[Overview](#)
[IP address usage](#)

Overview

This feature lists how your system uses IP addresses.

IP address usage

The following columns appear in the *Show IP Address Usage* table:

Column	Description
<i>IP Address</i>	Displays the IP address to which the information applies.
<i>Http Usage</i>	Displays the domains that are hosted by the specified IP address.
<i>Ftp Usage</i>	Displays the domains that are associated with FTP accounts.
<i>Mail Usage</i>	Displays the number of email accounts that the associated domain hosts. For example: <i>example.com (3 accts)</i> means that <code>example.com</code> hosts three email accounts.
