

# Change Log

*For cPanel & WHM version 64*

*(Home >> cPanel >> Change Log)*

[Overview](#)  
[Change Logs](#)  
[Additional documentation](#)

## Overview

This interface lists published builds of cPanel & WHM software. The *Change Log* interface's entries include fixes, enhancements, and patches.

## Change Logs

On the left side of the interface, click *Change logs for all versions* to view a list of available change logs for all versions of cPanel & WHM, EasyApache, and the Migration Script.

On the right side of the interface, click *Change Log feed* for your server's version of cPanel & WHM, or click *Change Log feed for all versions* to view the feed for all versions of cPanel & WHM. The feeds are in Atom format, which you can add to your preferred feed reader to automatically receive change log updates.
